

YOUR CHALLENGE. OUR EXPERTISE.

IIA Lifting Services has a national footprint of certified inspectors that allows us to provide you timely, on-site inspections and after-hours testing, ensuring no disruptions to your operations. We are industry leaders and our expertise, safety, and comprehensive reporting defines our reputation.

THE SERVICE YOU DESERVE

When it comes to fleet management, IIA focuses on maintaining safe equipment and maximizing the life of each unit. Our new Fleet Industrial Inspection Tracker (FIIT) software enhances our ability to track inspections and sort data for user-friendly, actionable reports. FIIT helps Fleet Managers maintain the standards of safety for every truck.

SAFE

We know that safety is the number one priority when it comes to your fleet. We use not only visual and operational tests, but also several non-destructive testing methods to ensure the overall operational integrity of your equipment.

RESPONSIVE

Our technicians are strategically located throughout the United States, which allows us to provide fast and flexible service for timely and accurate inspections to keep your fleet safe and your crew on the road.

MOBILE

We come to you and provide live-line tools and rubber goods testing and certification. Our mobile lab has been customized with safety requirements and efficiency in mind.

SERVICES INCLUDE

**Aerial Devices &
Digger Derricks**

**Live-Line Tools &
Rubber Goods Testing**

Ground Support Equipment

Fire Department Testing

TURNING DATA INTO KNOWLEDGE

We issue an IIA specific and comprehensive Fleet Safety Analysis, which is an exhaustive post-inspection report regarding your equipment, its current condition, necessary repairs, and future maintenance suggestions.

Highly Qualified Inspectors

IIA's team exclusively consists of highly skilled, trained, and qualified inspectors who are ASNT certified and SNT-TC-1A qualified for non-destructive testing methods. Our professionals are also knowledgeable and up-to-date on current OSHA, ANSI, and NFPA standards and perform operational and visual inspections, non-destructive testing, and also maintenance and minor repairs.

Custom Inspection Software

Our IISP platform provides electronic, detailed, and categorized inspection data and segments information by manufacturer, unit, garage, state, and region. The Fleet Management Reporting Package can be viewed any time via your customer account and includes IIA's comprehensive Fleet Safety Analysis.

Internal Quality Assurance

We perform internal Quality Assurance Audits as evidence of our commitment to safety, excellence, and story-worthy service. Our crews are audited periodically and by customer request. We provide extensive training and continued education for all of our technicians, and we provide comprehensive training for apprentice technicians.

Let Our Experts Help.

Let us provide your company with all of your lift needs for the future.
