

IIA FIELD SERVICES

IIA'S COMPREHENSIVE INSPECTION PLAN:
LOCATION MATTERS.

Making the World Safer

When it comes to inspecting the internal condition of your pipes, even the world's best technology is pointless if you are looking in the wrong areas. At Industrial Inspection & Analysis, we work with you to develop a comprehensive inspection plan that gives you all the data you need to make well-informed decisions that are in the absolute best interests and safety of your chemical plant or refinery.

1

Consultation, engineering, and planning for inspection effectiveness.

Gather the most complete and accurate information regarding your project.

2

3

Identify the most important issues of safety, liability, and potential risks for you to review, consider, and take action on.

Actionable solutions that have been deemed necessary and appropriate.

4

You can be confident in working with IIA, as we have the most extensive range of Hazardous Classification Equipment for our inspections, and our equipment is available for rent and can either be picked up or shipped across the United States and to portions of Canada. The speed and safety of our service ensures timely results and minimal restriction to work areas. Our Field Services teams are available for emergency call-out work or long-term projects.

Whether choosing the right equipment or discussing options that might help mitigate your risk, our team is just a phone call away.
