

Reduce Downtime With Outage Season in Full Swing

In late September, utilities and first responders rallied to provide aid and restore power in the wake of Hurricane Ian. We made sure we were available as well to help with any live line testing and to provide lift inspections of bucket trucks and more during this time of crisis. We also know the importance and what it takes to stay in compliance and in operation.

- Reducing testing time
- Getting ready for the coming ice storms
- Supplementing your regular inspection with a thorough structural NDT inspection
- Meet [Brian Burger](#), who knows what it means to be a team player.

Please call (623) 235-8188 or visit Industrial-IA.com to learn how IIA can help make your world safer.

Sincerely,

Sam Yank

Director of Sales, IIA

IIA Helps JCR Construction Reduce Testing Time by 75%

Since 1984, New Hampshire-based JCR Construction (JCR) has helped keep the lights on across New England, and rallied to aid utilities across the nation in the wake of the most severe storms. In this inherently dangerous business, annual testing of bucket trucks, live line tools and protective gear is critical to keeping line workers safe. Read how IIA's [mobile testing labs](#) helped JCR reduce testing time by 75%.

Could your cranes be hiding cracks?

Even with routine annual inspections, your cranes could have cracks that could lead to structural failure. That's because overhead crane service technicians are not typically trained in structural inspection, and often do not have non-destructive testing capabilities. Depending on the age and demands on your crane, IIA recommends supplementing your regular inspection with a thorough structural NDT inspection. [Learn when and why to consider structural NDT inspections](#) for your cranes.

Brian Burger: Competing for the Customer

Skilled in sports ranging from baseball to soccer and basketball, Brian Burger grew up on the field and the court. Today, the keen sense of competition he developed early in life translates to wins for IIA's customers. "I've got a strong competitive nature," he says. "When I take something on, I take it to the end. I let the customer know that I'm here to help in any way, and that I'll always be involved in the process." [Get to know Brian.](#)

Elevate Your Expectations

As a trusted leader in lift equipment inspections, IIA takes quality and safety to a higher level. Our large footprint in North America allows us to provide fast and flexible service, whether you need routine inspections or emergency repairs. We can even provide after-hours testing to minimize disruptions to your operations. [Learn more about our comprehensive lift services.](#)

What Our Customers Are Saying

"IIA understood our sense of urgency, and they delivered 100%. It was refreshing to work with a company that actually delivered exactly what they said they would."

— Rob Berube, JCR Fleet Manager

Airlines: Are Your De-icers Ready to Roll?

Winter is just around the corner. For airlines, now's the time to make sure de-icers are ready when you need them — and IIA can help. Our annual inspections help ensure the safety of de-icing and other GSE, overhead cranes, emergency response vehicles, and more. [Check out our comprehensive services](#) for aerospace companies, and schedule your testing today!

Let's Connect

We want to hear from you! Let us know about your latest inspection challenges and how we can help. Call us at **(623) 235-8188** or complete our [online form](#) and we'll get back to you within 24 hours.

Be sure to follow us on [LinkedIn](#) to learn about the latest tools and techniques we're using to solve our clients' problems and make the world safer.
