

LIVE LINE TOOLS & RUBBER GOODS TESTING

Industrial Inspection & Analysis (formerly known as *Diversified Inspections*) has provided comprehensive inspections and non-destructive testing services since 1969. We are a nationally recognized industry leader in onsite live line tool and rubber goods testing. Over the years, our company has provided specialized testing services designed specifically to ensure overall safety of our customers, by following testing guidelines outlined in ASTM and OSHA Standards.

We offer a change-out service with customer-supplied products for any failed items, to ensure that your employees have all the necessary tools to work safely and efficiently.

OUR NETWORK OF CERTIFIED TECHNICIANS IS STRATEGICALLY LOCATED THROUGHOUT THE U.S. AND, WITH OUR MOBILE LABS WE ARE ABLE TO PROVIDE THE FOLLOWING ON-SITE TESTING SERVICES:

- Fiberglass Hotarms
- Fiberglass Ladders

Fiberglass tools are visually & mechanically inspected before being cleaned, waxed, & dielectrically tested

- Truck Grounding Reels
- Mechanical Jumpers
- Ground Jumpers
- Hotsticks

After thorough inspection, all tested & passed items will have a weather resistant decal attached to identify the test date & next due date.

- Rubber Insulated Gloves, Sleeves, and Blanket
- Insulated Line Hose

Rubber goods are visually inspected & cleaned before a dielectric test is performed.

We have established a national network of trusted live line technicians to better serve customers across the continental United States. With these crews strategically located in nearly every state, we can bring our mobile live line testing lab to your site with minimal travel time.
