Documentation is Key to Ontario Crane Regulations

Crane owners, sharpen your pencils! Detailed documentation is more important than ever to comply with the new Ontario crane laws. Read why [logbooks are critical](#) and what to do if you don't have one.

Put Quality in the Driver's Seat of Automotive Manufacturing

The average car contains an estimated 30,000 parts. And it's critical to ensure the quality of each one before it ever hits the road. IIA is equipped to examine any part with confidence — from the smallest nuts and bolts to wireless technology, auto body panels and engine blocks.

What Our Customers Are Saying

“Not only does your technician satisfy and impress field operations, his expertise alleviates an immense amount of workload off of my plate.”

- Area Fleet Manager

Top 10 Questions to Ask When Evaluating Inspection Providers

When evaluating inspection providers, it's important to ask the right questions. As a leader in NDE, IIA offers these [Top 10 Questions](#) to ask when evaluating potential partners.

Watch: Comprehensive Fire Truck Inspections

Is your fire station looking for a streamlined and worry-free inspection experience? [Watch a brief video](#) showcasing IIA's top-to-bottom fire truck inspections.

Walking the Talk on Safety

Total Recordable Incident Rate (TRIR) — the number of injuries per hours worked — is an excellent indicator of a company's safety culture. IIA's low TRIR of .49 in 2023 reflects our commitment to safety — and our mission of Making the World Safer. To reduce your risk, [read why](#) you should consider TRIR when evaluating inspection companies.

Understanding Testing Requirements for Aerial Devices

For booms, ladders and other aerial devices, improper maintenance and metal fatigue are the most common problems that lead to safety issues. Adhering to a scheduled testing and maintenance program is the easiest way to protect people and property — and IIA can help.

Tim Royer: Testing Expertise & a Sunshine State of Mind

Equally comfortable under the sea or under the hood of a classic car, Tim Royer is always up for a challenge.

And that includes the diverse challenges he encounters as Lab Manager for IIA's Florida EMC lab. [Get to know Tim.](#)

API Solutions from A-Z

You understand the need to periodically inspect tanks, pressure vessels and process piping. But if these inspections reveal flaws, cracks or corrosion, what's next? Whether you need a simple [API inspection](#) or advanced engineering analysis, IIA's turnkey solutions will maximize the life of your equipment and make your life easier.

Let's Connect

We want to hear about your inspection and engineering needs. Whether you have a quick technical question or need urgent, on-site assistance, we're here for you. Call us at **470-646-6264** or complete our [online form](#) and we'll get back to you within 24 hours.

Be sure to follow us on [LinkedIn](#) to learn about the latest tools and techniques we're using to solve our clients' problems and make the world safer.
