Top 10 Questions to Ask When Evaluating Lab Service Providers

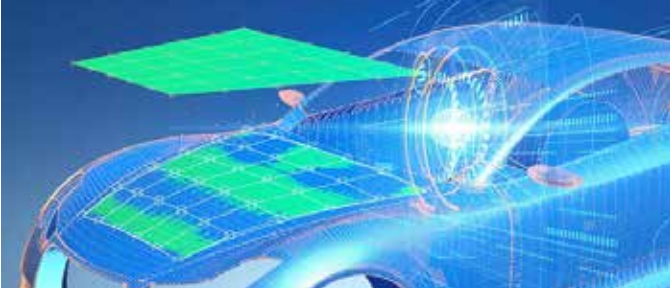

When evaluating lab service providers, it's important to find a firm with the technical know-how and customer service to meet your needs. As a leader in lab testing, IIA offers these [Top 10 Questions](#) to ask when evaluating potential partners.

What is SAR Testing?

To protect consumers, Specific Absorption Rate (SAR) testing is required for all wireless devices with RF radiating parts that are closer than 20 cm (about 8 inches) from the body or head when in use. With our cutting-edge DASY8 system from SPEAG, IIA can test for compliance with local and whole-body SAR limits from 4MHz to 10GHz.

Put Quality in the Driver's Seat of Automotive Manufacturing

The average car contains an estimated 30,000 parts. And it's critical to ensure the quality of each one before it ever hits the road. IIA is equipped to examine any part with confidence — from the smallest nuts and bolts to wireless technology, auto body panels and engine blocks. [Read more.](#)

Calibration: How Does IIA Measure Up?

Calibration—comparing an instrument's accuracy to known standards—is essential to maintaining the reliability of tools over time. Choosing the right calibration vendor can help manufacturers stay one step ahead of their competition. For accuracy that is second to none, IIA offers calibration and repair services for tools ranging from calipers and CMMS to microscopes and voltmeters.

Tim Royer: Testing Expertise & a Sunshine State of Mind

Equally comfortable under the sea or under the hood of a classic car, Tim Royer is always up for a challenge. And that includes the diverse challenges he encounters as Lab Manager for IIA's Florida EMC lab. [Get to know Tim.](#)
