IIA's Pump Commander: Fired Up & Ready to Roll

Fire pumps due for testing? With IIA's Pump Commander, firefighters never need to leave their district. These mobile testing units allow us to provide annual NFPA-compliant **Fire Pump Testing** on location to ensure pumps will perform when they are needed.

How Routine Inspections Mitigate Environmental Damage

Try as we might, we cannot control the weather — or the impact it may have on the safety, performance, and lifespan of critical equipment. By identifying structural integrity issues in the early stages, non-destructive testing acts as an early warning system for weather- and environment-related damage. [Read our blog.](#)

Bucket Trucks Benefit from Fluid Testing

Bucket trucks depend on the hydraulic system to safely raise, lower, extend, and position the boom and bucket. When hydraulic fluid becomes contaminated or degraded, it can lead to sluggish or unpredictable boom movement and serious safety hazards. [Learn how fluid testing can keep hydraulic systems humming along.](#)

Attention to Detail Earns Praise

During a routine inspection for a Washington utility, IIA identified and reported a seemingly minor issue involving a bracket on a bucket truck. The manufacturer deemed the issue significant enough to pull the part from service. The detailed reporting of IIA's eagle-eyed inspector may have prevented a more serious failure down the road. [Read more.](#)

THE LATEST FROM IIA'S LIFT SERVICES TEAM - Q4 2026

When was the last time your lift equipment was inspected?

When you're caught up in the daily grind, it's easy to put annual lift inspections on the back burner. As we enter the fourth quarter, now's the time to move unfinished inspections to the top of your to-do list — and **IIA can help**.

Are your de-icers ready for winter?

Winter is just around the corner. Now's the time for airlines to ensure that de-icers are ready to roll. IIA can develop a comprehensive testing schedule that will keep equipment safe and your company in compliance. Learn more about our [Services for Aerospace Companies](#).

On-Site Tool Testing Saves Time & Trouble

Planning and scheduling annual testing can be a logistical nightmare when live line tools and rubber goods must be sent off to a third party for testing. On-site tool testing saves utilities time and trouble by eliminating labeling, packing, shipping and waiting. [Learn more](#).

Mark Your Calendar for Fluid Analysis Webinar Oct. 21

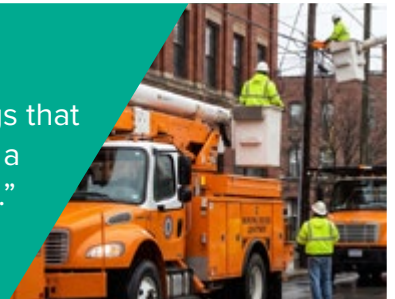

Hosted by [Nicholas Reich](#), IIA is offering a 30-minute fluid analysis webinar on October 21 from 12:00 p.m. to 12:30 p.m. EST. The session will explore how wear metals, fluid health, contamination, and other testing methods can provide insight into equipment condition. Space is limited, so [reserve your spot today!](#)

What our Customers are Saying

"The team you have working with us are backing my team up and finding things that may have been missed or fallen through the cracks. Which is exactly the way a partnership should work. Please let them know I am a very pleased customer."

- Fleet Manager, Tacoma Public Utilities
